

Our knowledgeable instructors lead live-virtual training sessions covering different features of the 2GIG® ecosystem with product demos, to help you succeed whether you are new to 2GIG or already certified.

Choose from 3 courses:

2GIG EDGE Expert

A comprehensive overview of the EDGE system hardware & software features, sensor programming, Z-wave configuration, cameras, and troubleshooting strategies.

2GIG EDGE Best Practices

Covers features of the EDGE panel, including the complete sensor line, takeover module programming, cameras, and facial recognition.

2GIG Security Professional

A basic introduction to the 2GIG ecosystem, highlighting the differences between GC2e & EDGE and their features and benefits.
